

EDUCATION

University of Antioquia
Master's degree in mathematics

Graduating in August 2025

University of Antioquia
Undergraduate degree in mathematics

Feb 2014 - Aug 2020

Languages

Spanish: Native
English: B1-B2

WORK EXPERIENCE

Stable LLC
Data Analyst

Bogotá, Colombia
 March 2023 - Present

- As data analyst, responsible for designing, creating, and maintaining multiple dashboards connected to Azure databases. These dashboards significantly simplified monthly financial calculations and provided precise insights into user behavior across various time intervals.
- Created various pipelines for the extraction and storage of databases from multiple sources, including MongoDB, HubSpot, and Google Analytics, to Azure SQL, efficiently centralizing the information for subsequent analysis and visualization
- Use and implementation of several Azure ecosystem tools (including Azure databases and pipelines made in Azure Data Factory) to streamline data processing workflows, enhance data integration, and improve overall data management efficiency

COREDI Organization
Mathematics and Physics Teacher

Marinilla (Ant), Colombia

Jan 2021 – Sept 2022

- Spearheaded the design and implementation of versatile teaching methodologies, both in virtual and in-person settings, tailored to the individual needs of students, resulting in enhanced engagement and comprehension.
- Cultivated soft skills such as empathy and resilience, fostering an inclusive learning environment that bolstered student confidence and motivation, leading to notable improvements in overall performance.
- Played a pivotal role in revamping and updating educational plans and projects in alignment with institutional guidelines, ensuring the efficiency and relevance of educational programs, thereby streamlining processes and optimizing outcomes.

PROJECTS

Stable LLC - Landing Page

2020

Creation of the landing page for the Company Stable LLC

- Contributed to the refactoring of the client-side web application, implementing a responsive design using React.js, Next.js, CSS, JavaScript, and Material UI, resulting in improved usability and performance.
- Leveraged npm JavaScript modules extensively and adopted web development best practices, enhancing code quality and maintainability.
- Acquired proficiency in Git, JavaScript, React, and the team's entire Software Development Life Cycle (SDLC), facilitating effective collaboration and contribution to project success.

ACO Algorithm

2019

A slightly modified ACO for visual purposes

- Find a minimum path connecting two non-adjacent nodes, subject to passing through an intermediate node.
- In this project I used technologies such as Python, libraries such as Pandas and Numpy for the algorithm implementation creation of several simulations and data loading.
- The graphs were made with Matplotlib

SKILLS

PROGRAMMING LANGUAGES

2 years: JavaScript, Python,
 Complementary languages: R, Matlab, Latex

ONLINE COURSES

Advanced machine learning and signal processing (Coursera)
 60 years of AI (Coursera)
 Full-stack web development (Henry)

TECHNOLOGIES

Data Analysis: Power BI, Azure Portal, Azure Data factory, Azure Databricks, Azure Functions, Azure SQL Databases, Pandas, Numpy, Scipy, Matplotlib, Plotly, scikit-learn, SQL, MongoDB (NoSQL)
 Web development (Front end): HTML, CSS, React, Redux, Nextjs, Material UI
 Web development (Back end): Node.js, Express, Sequelize
